First Stepps

Palmonda WebDesk

Welcome to Palmonda WebDesk

Palmonda WebDesk is an HTML/CSS/JS based online Desktop System. For example when you have an tablet and you want to use it just like a laptop you can use WebDesk to simulate an window-based desktop computer.

It works in all common browsers. But I got the best experience in Firefox.[1]

Palmonda is storing all its data in the local Storage and the session Storage. When you clear the local Storage and the session Storage or clear the browser files, you will delete all WebDesk data. Sometimes you can download something or print it (Look: Download & Print).

[1] I mean: The latest version of Mozilla Firefox. I wasn't paid to write this.

Setup

- Accept Privacy Policy
- Open Settings (Blue Icon in Taskbar)
- Click password input
- Enter a new password
- Click username input (Maybe it says: žée)
- Click "Save Profile"
- Close settings window
- Reload WebDesk

Download & Print

Sometimes you can download a file or print it. By printing the file, it may be possible to export it as PDF. When you download something, it has an strange name (e.g. ZXhhbXBsZQ) and has no ending, so you have to rename it. When you download a text-file (e.g. "Download TXT", "Export as Text"), you have to rename it to *HereGoesTheFileName*.txt. You can open the text-file in your text-editor.

Editors and Endings (How to open a …-file)

Ending	Editor
.txt	System Text Editor
.html or .htm	Web Browser (e.g. Firefox, …)
.pdf	Your PDF Editor
.desk	Copy text to WebDesk (Look: Open .desk)

Open .desk

- Choose file
- Open Context Menu
- Open with your text editor

- Press Ctrl + A
- Press Ctrl + C
- Open WebDesk
- Open Application
- Click "Load file"
- Choose textarea
- Press Ctrl + V

How to reset my account?

- Open Settings
- Search Danger Zone
- Click "Delete Everything"
- Reload WebDesk

Local & Session Storage

The local and the session storage are web technologies, like cookies etc., but I don't sell/share your data. Furthermore only palmonda-websites can read your data from the local/session Storage. And I don't use your data to show ads (or something like this).

Pricing

Everything is free.[2]

[2] Does not apply to content embedded via WebDesk.

Disclaimer

I am not responsible for the content made available in WebDesk. Furthermore, I am not liable for any damage caused by WebDesk. I would also like to point out that I am not liable if you illegally display or load third-party content using the software I have developed. It is also your responsibility which website you load with the help of WebDesk or which (web) server you communicate with (and exchange your IP address).
